

Shipping Best Practices

- U.S. Pallets or Euro Pallets as specified.
- Pallet composition as specified by customer.
- Pallets secured horizontally and vertically with shrink wrap and corner boards (as needed) for load stabilization.

BrushOff takes correct shipping practices for our domestic and international customers seriously. Every precaution is taken to assure that shipments follow all protocol and guidelines for transit to their destination.

- Cartons are always stacked securely and squared off at the top.
- Product never extends beyond the outer edges of a standard pallet.
- Labeling guidelines per customer specifications are strictly adhered to.
